## Passengers increased 4.3%, reaching an 82.8% load factor

**Mexico City, January 12, 2026** – Viva announced today its December 2025 preliminary traffic results. Viva's passenger traffic increased 4.3% compared to December 2024, reaching 2.7 million passengers.

Viva grew its total capacity in available seat miles (ASMs) by 5.8% compared to December 2024, reflecting a 5.2% increase in domestic capacity and an 8.0% increase in international capacity. Load factors stood at 82.8% compared to 87.1% in 2024, with a load factor of 84.9% and 75.4% in domestic and international, respectively.

“December passenger volumes increased 4.3%, driven by seasonal demand. Our load factor of 82.8% reflected weather disruptions in Tijuana and international capacity reallocation from the new Mexico City Airport (AIFA). Throughout the year, we managed a complex industry environment with discipline and resilience, overcoming pressures from Pratt & Whitney engine recalls and a challenging macro backdrop. Despite these challenges, we concluded the year reaching the highest passenger figure in our history with close to 30 million.” said Juan Carlos Zuazua, CEO of Viva.
