

# Traffic Report | May 2026

**Passengers decreased 1.4%, reaching an 89.0% load factor**

**Mexico City, June 8, 2026** – Viva announced today its May 2026 preliminary traffic results. Viva's passenger traffic decreased 1.4% compared to May 2025, reaching 2.5 million passengers.

Total capacity in available seat miles (ASMs) decreased 11.1% compared to May 2025, reflecting a 7.7% reduction in domestic capacity and a 26.3% decrease in international capacity. Network load factor increased from 84.8% to 89.0%, with domestic and international load factors of 90.2% and 82.2%, respectively.

"May traffic reflected the proactive capacity adjustments we have implemented in response to the current macroeconomic environment and elevated fuel prices. Passenger volumes decreased 1.4%, while the load factor improved to 89.0%, supported by disciplined capacity deployment, particularly across international markets. While Pratt & Whitney engine groundings continue to constrain fleet availability and the consumer environment remains cautious, we continue prioritizing operational reliability and aligning capacity with prevailing demand conditions", said Juan Carlos Zuazua, CEO of Viva.
