Passenger traffic decreased 7.1% as capacity declined 11.0%; load factor increased to 89.4%

Mexico City, October 9, 2026 – Viva announced today its September 2026 preliminary traffic results. Viva transported 2.2 million passengers in September 2026, a decrease of 7.1% compared to September 2025.

Total capacity in available seat miles (ASMs) decreased 11.0% compared to September 2025, reflecting a reduction of 11.2% in domestic capacity and 9.8% in international capacity. Load factor increased to 89.4%, with domestic and international load factors of 90.6% and 83.5%, respectively.

“September reflects the continued capacity adjustments we have been implementing throughout the year, as we moved into a seasonally lower period. Passengers decreased 7.1%, while our load factor improved to 89.4%, reflecting the alignment between our operation and prevailing demand conditions. We continue to adjust capacity with demand while managing elevated fuel prices and the ongoing Pratt & Whitney engine groundings, focusing on network flexibility and operational reliability,” said Juan Carlos Zuazua, CEO of Viva.
